🔔 Information About FIAT Gateway Systems

Dear Zed-FULL *plus* users,

On FIAT DOBLO (2017–2020) and FIAT EGEA / TIPO (2023–2025) vehicles, a **gateway** system is present. Therefore, a **bypass** procedure must be performed to ensure proper communication between the device and the vehicle. This process is required to program a new key for both add key and lost key situations. Once the **bypass** procedure is completed, the **Zed-FULL *plus*** device will be able to communicate with the vehicle and perform the required **PIN code and pre-coding** operations. During this process, the bypass connection must remain active until the key programming process is fully completed. When the key addition procedure is completely finished, the connection should be terminated.

- The socket for the short circuit is above the pedals at the left of the steering column.

Now, let's view our QR code that will allow us to access the vehicle's short-circuit diagram by selecting the brand, model and year through the OBD menu.
